

# VT Group

## People. Partnership. Performance.

With more than \$400 million in U.S. sales, VT Group is an industry leader in engineering support services, providing military, civil and commercial customers with multi-disciplinary professional services in:

- C4IT network design, integration and installation
- Critical asset management
- Equipment life cycle support
- Facility operations and maintenance
- Logistics services and support
- Utility management
- Unmanned aerial systems

VT's reputation as a superior support service provider rests in its three lines of business—Integrated Solutions, Technical Services and Unmanned Systems. Integrated Solutions provides turnkey engineering design and technical services for advanced electronics and communications systems worldwide. Beyond maintenance logs and inventory sheets, the Technical Services division collaborates with our customer to determine mission requirements, and continuously looks for ways to improve efficiency and effectiveness. As a pioneer in the unmanned services industry, the Unmanned Systems line of business is uniquely positioned to be a global value-adding partner in the commercial and public sectors.

Supporting global organizations requires in-depth training and a highly-skilled workforce that is seasoned and committed. Our more than 2,300 employees worldwide are passionate about serving our customers, providing tailored mission support services from design and acquisition to operations, training and maintenance of facilities and assets. Our operations span more than 80 locations throughout the U.S. and serving in forward locations such as Afghanistan, Iraq, Kuwait, Africa, Japan and Guam.

## Integrated Solutions

### **C4ISR Services**

Provides technical and engineering services for fleet- and shore-based communications, navigation and electronic warfare systems.

### **Enterprise Solutions**

Supports major information technology systems programs from network design to integration, installation and administration.

### **Security and Surveillance**

Provides planning, installation and support of advanced physical and IT security systems in military and civilian environments, as well as information assurance and force protection.

### **Healthcare System Infrastructure and Services**

Delivers and supports healthcare information management, IT infrastructure and communication systems for commercial and government healthcare providers.

### **Fabrication and Manufacturing**

Designs and constructs high quality, custom products as diverse as large antenna platforms, radomes, surrogate targets, equipment foundations, ventilation ducting, and complex electronic enclosures.

### **Mobile Shelter Solutions**

Delivers industry-leading mobile shelter solutions to military bases around the world, including refurbishment, design, installation, integration, testing, deployment, operation, maintenance and training of a wide range of standard and custom shelters.

## Technical Services

### **Readiness and Logistics**

Provides a full range of operational readiness and logistics services, depot-level maintenance, supply operations, fuel operations, passenger and cargo transportation, vehicle and equipment maintenance and RESET and mobilization and demobilization support.

### **Supply Chain Support**

End-to-end program and product quality management, including subcontractor management, BOS supply and international distribution, forecast and demand planning and COSIS inventory management.

### **Technical Publications**

Performs complex technical support and training, and produces technical manuals and publications that empower customers to save millions of dollars in expenses and manpower.

### **Maintenance**

Beyond keeping up-to-date maintenance logs, advises our customers and reduces asset down time and costs in support of maritime docks and cranes, HUMVEE RESET and commercial fleets.

### **Facilities, Infrastructure and Range Management**

Provides a multitude of facilities, infrastructure, and range management and planning activities for the U.S. armed forces and other federal, including full utilities and infrastructure operations and maintenance.

### **Security and Emergency Services**

Offers force protection (guard services and marine patrol), fire and emergency medical technician and paramedic services, pass and identification, 911 call center, fire prevention inspections and confined space rescue services, training and support.

### **Training and Training Devices**

Offers a diversified set of training services and solutions throughout the program or system lifecycle. By evaluating training programs, we provide input and recommendations for training and training support devices.

## Unmanned Systems

### **Support Services**

Supplies unmanned vehicle (UV) support and services, including operating and providing as fee-for-service (wet leases) more than a dozen UVs, field service representatives, payload integration and maintenance services to support vital military and commercial interests in the U.S. and overseas.

### **Training**

Offers customized, platform-specific training courses that are certified and approved by Original Equipment Manufacturers.
